EASY TO USE

MobilTEK Case is a rugged, reliable, and easy to deploy telemedicine examination kit. Each component is designed to create a seamless patient visit for the presenter and the provider. Easy to read labeling and intuitive component docks enable the presenter to focus on the patient instead of fumbling with equipment. No more tangled wires or guessing what plugs where - the MobilTEK Case is wired to have a single external port so that everything can be charged at the end of the day from one cord without opening the case.
